Subject: Penn State Center for Energy Law and Policy Pilot Project White Paper and Working Groups
Attachments: PSUCELPMethaneEmissionsRegulationWhitePaper091818.pdf

Good morning,

Thank you for your constructive engagement over the last several months in the Penn State Center for Energy Law and Policy's pilot project on methane emissions regulation of unconventional oil and gas. I am pleased to share with all of you a pre-release copy of the White Paper (attached), which we will be publicly releasing in the next few days. The White Paper incorporates the feedback we received on the draft, discussions at the conferences, new developments, and additional research.

Ekrem Korkut has also created a library guide that collects legal, scientific, economics and engineering resources relating to the methane emissions from unconventional oil and gas, <https://pennstatelaw.libguides.com/c.php?g=828253&p=5913537>. The guide provides links to relevant regulations, reports, and academic papers.

We look forward to continuing our constructive work together through the working groups, all of which have had their initial meetings. We are planning to have regular one-hour meetings of the working groups (which focus on science/technology, economics, and regulation) to allow busy people to actively participate. If you have not yet joined a working group, and would like to do so, please email Ekrem Korkut, EZK137@dsl.psu.edu.

We look forward to our continued collaboration with you on these and other important energy law and policy issues. We hope that the combination of independent, interdisciplinary research and dialogue among key industry, government, and environmental leaders will help support needed policy progress.

Best regards,
Hari
